Wolfsberg, Marilyn Fleischer	281

SUBJECT INDEX

	Page
Acetone fractions from adult chicken organs	66, 67
Acid-soluble phosphorus in hamster testes	209
Albumen dialysate,	
chromatographic analysis of	33
localization of ninhydrin in	34
preparation of	31
Aldolase activity in chick development	288, 289
Aminoacetonitrile	
effects on skeletal structures	45
Amino acid analysis of normal and tumor tissues	145
Amino acids	
dietary requirement of	141
effect on somite development	40
in growing tissues	141
Analysis of rat tissues	142
Animal fat	
lack of effect on total blood glutathione	2
Antigens from single cell types	230
Antiserum against ascites tumor	221
complement fixation and cell agglutination activity of	225
effect on survival of tumor-bearing mice	228
Ascites tumor	
cell agglutination titers	226
development	221
Basophilic corpuscles in bone spicules	47, 48, 49
Beef cattle	
blood glutathione level	1
Beta radiation effects following injection of P^{32}	219
Blood	
glutathione level in	1

Body weight increment
effect of growth hormones on 125
Bone formation 48
Breeding season of *Trichosurus vulpecula* 178
Cartilaginous spicules 48
Cell counts in tissue culture 153
DNA analysis 155
Cell population in monolayers 151
Chick blastoderm
culture of 37–39
Chick embryo development 287
metabolic enzyme activity 287
Chick embryo tissues
amino acid content 144
comparative enzyme activity in 292
Chick fibroblast cultures
areal changes in 64
glycolysis in 66
growth of 53
stimulation by cultures of adult brain 61
Chick myoblasts
DNA content of 156
effect of embryo extract on 160
growth in chicken serum 162
growth in horse serum 161
kinetic studies of 158
typical growth curves 159
Chick organs
relative activity of nucleoprotein fractions of 65
Chick somites
genesis of 29
media for culturing 35, 36
Chinook salmon
early growth of 197
Chlortetracycline
effect on blood glutathione level 1, 4
Chromosomes of mutant *Drosophila* 264, 266
Colloid disappearance under treatment with Rauwolfia 93
Colpidium 11
Comparison of nucleoprotein fractions from juvenile and adult tissues . . 69
Complement and production of cytotoxic reaction 231
Contractile substance
essential pattern 73
in muscle fibers 73
Culture techniques and growth measurements 152
Cyanide inhibition of growth of *Tetrahymena* 26
Cytochrome oxidase activity in chick development 288, 290
Cytology of insect tumors 130
Cytoplasmic: nuclear ratio in *Tetrahymena* 13
Cytoplasmic pattern in striated muscle fibers 73
Cytotoxicity of antiserum against ascites tumor 224
in vivo 225
in vitro 225
Cytotoxic antiserum from rabbits 231
Development of muscle fibrils 73
from mitochondria 73
submicroscopic precursors 73
Developmental time in *Drosophila* 282

Page

Diethylstilbesterol
effect on blood glutathione level 1, 4
Discoidal fibers in tadpole muscle 76
Distribution of *Drosophila* tumors by size 132
Drosophila germarium
zonation of 133
Drosophila tumors 239
Drosophila gibberosa
developmental time 282
Drosophila melanogaster
developmental time 282
fecundity as a function of genotype and nutrition 243
longevity as a function of genotype and nutrition 243
oogenesis 95, 129, 239, 263
stocks of 241
studies of mutant effects 254, 255
Drosophila pseudoobscura
developmental time 282
Drosophila virilis
developmental time 282
Effect of age of donor on growth stimulatory action of nucleoprotein fractions . 63
Effect of nutrition on longevity, fecundity and ovarian cytology 248
Egg of *Drosophila*
origin of 133
Egg white
components influencing somite development 42
growth stimulating factors in 29
Ehrlich mouse ascites tumor 222
preparation of antigen from 222
Electron miscroscopy of muscle 76–81
Endochondral growth in normal rats 125
Endogenous growth hormone
secretion of 127
Epiphyseal cartilage 120–123
effect of hormone treatment 124
growth of 120–123
Epiphyseal plates,
histology of 118
Enzyme accumulation patterns in embryonic development 294
Enzyme assay in chick development 288
Enzyme levels in embryonic development 292
Femur, rat 48
effect of aminoacetonitrile on 48
Fluorescent light,
effect on salmon embryos 203
Free nucleic acid 69
Frontal bone cultures 57
Frontonia leucas 17
Fluctuation in mitotic rate 106
Fruit fly
food intake of 95
Fused gene in *Drosophila melanogaster* 240
effect on ovary size 245
phenotypic characterization of 242
Fused ovaries in *Drosophila melanogaster*
tumors of 245
Glass substrate cultures of chick myoblasts 149
Glaucoma 11

Page

Glutathione and economy of gain 6
Glutathione level in blood 1
Growth
of bone 48, 125
of chick blastoderm 37–39, 53
of chick myoblasts 149, 159–161
of *Drosophila* embryos 282
of *Drosophila* oocytes 102
of marsupial pouch-young 167
of muscle 73
of salmon embryos 197, 202
of sarcomeres 74
of *Tetrahymena pyriformis* 14
of *Trichosurus vulpecula* 167, 185
comparison with higher mammals 186, 187–189
comparison with other marsupials 185
Growth characteristics of *Tetrahymena* 11
Growth curves for *Trichosurus* 189
equations for 193, 194
Growth hormone 115, 117, 125, 126
Growth rates in tissue cultures 157
Growth-stimulating effects of
egg white 29
nucleoprotein fractions 54, 63
streptomycin precipitates 68
Growth studies, quantitative 149
Hair growth 110
Hamsters,
growth of testis in 210
Heart tissue cultures 58
Hereditary ovarian tumors in *Drosophila melanogaster* 239
Histologic alterations in thyroids of rat treated with Rauwolfia alkaloids . . 92
Immunization of mice with antiserum from ascites tumor 223
Labile tissue proteins 69
Lathyrism 45
basophilic globules in 50
Lathyrus odoratus 45
Leucine content of mouse tissue 144
Leucine, lysine and tryptophane in growing tissues 141
Leucophrys 11
Lysine content in mouse tissue 144
Lipid phosphorus in hamster testes 210
Mean growth rate of cockerels on meprobamate feeding 138
Media for culture of chick somites 35
Meprobamate, effect on growth of chicks 137
Metabolic enzymes in development of the chick 287
Mitotic activity of epidermis 105, 108
Mitotic activity of hair follicles 106
Mitotic indices in epidermis 106
Morphology of *Drosophila* ovariole 257
Morphology of *Drosophila* ovary 256
Muscle contraction,
helicoid theory of 74, 75
Muscle fibers,
bird 76
regeneration at muscle-tendon junction 74
Muscle fibril multiplication 74
Muscle pattern 82

Page

Mutant stocks of *Drosophila melanogaster* 241, 264, 265
apterous 270
female-sterile 254, 255, 264
fused 240
narrow 254, 255, 264
raspberry 270
rotund 270
singed 267
Mutants
affecting yolk synthesis in *Drosophila* 270
affecting nurse cell nuclei 263
Nucleoprotein fractions
characterization of 56
correlation between 69
electrophoretic studies of 69
from chick tissues 53
isolation of 55
of embryonic tissue 69
ultraviolet absorption of 57
Nurse cell chromosomes,
effect of mutations on 264
Nurse cell nuclei 271
Nutrition and blood glutathione in cattle 1–8
Nutrition of *Drosophila*,
effect on ovaries 252, 253
Nutritional environment,
effect on blood glutathione level 1
Nutritional studies with protein-containing media 54
Oncorhynchus tshawytscha 198
Oocyte development,
rate of volume increase 101
Oocytes of *Drosophila*
preyolk stage 272
Oogenesis,
comparison in four species of *Drosophila* 281, 282
Oogenesis in *Drosophila melanogaster* 95, 129, 239, 263, 281
change in height of epithelial layer as function of time 101
change in egg volume as function of time 100
in sterile females 278
stage distribution of oocytes 97, 98
stage distribution as a function of time 99
Organic phosphorus in hamster testes 210
Ossification processes 48
Ovarian maturity in *Drosophila* as a function of age 283
Ovarian tumors in *Drosophila* 130, 239
Ovariole from irradiated ovary 131
Ovarioles, *Drosophila* 273
degenerating chambers 274
fusion chambers 275
sequence of morphogenetic events in 277
tumors in fused mutant 246, 247, 249, 268, 269
Paramecium caudatum 17
Paranuclear muscle pattern 86
Phosphorus,
acid-soluble 210, 212
distribution in hamster testes 210
lipid 212
protein 212

Phosphorus, organic
distribution in hamster testes 209
hormonal effects 209
relation to testis growth 209
Plasma cultures of chick tissues 53, 57
Potassium cyanide,
effect on growth and respiration of *Tetrahymena* 21, 24
Pouch-young
body weight: age 178, 180
linear equivalence 183, 184
relative growth 179, 182
Protein phosphorus in hamster testes 210
Protoplasmic content of *Tetrahymena* cultures 15
Radiation inactivation of genome 135
Radiation-induced ovarian tumors in *Drosophila* 129
Radioactive phosphorus distribution in hamster testes 209
Rat epidermis,
effect of irradiation on 103
Rat hair follicles,
effect of irradiation on 103
Rat skeletal structures 45
Rat testes,
phosphorus distribution in 213
Rations of beef cattle,
composition of 2
Rats,
mean body weight curves 118, 119
phenylalanine-tyrosine deficient 115
Rauwolfia alkaloids, ... 89
effect on the thyroid 89
Rauwiloid 89
Relations of phosphorus distribution to P^{32} administration 209
Salmon fingerlings, ... 199
length-weight analysis 200, 201
Skeletal muscle,
cultures of 58
growth in monolayer cultures 150
Skeletal structures,
effect of aminoacetonitrile on 45
techniques for staining 46
Somite genesis in the chick 29
Somite organizing centers 29
Sprague-Dawley rats 46, 89, 104, 116
Streptomycin fractions from adult organs 66
Sulfhydryl groups,
in egg white 33
nitroprusside test for 33
Succinic dehydrogenase activity in chick development 291
Testis growth in relation to phosphorus distribution 209
Testis phosphorus 214, 215
Testosterone-treated hamsters 220
Tetrahymena,
calculation of cell size 13
growth characteristics of 11
inhibition of growth and respiration in 21
Tetrahymena pyriformis 12, 22
Tetrahymena vorax 14, 22
The Beginnings of Embryonic Development (Book Review) 205
